Camera Comparison **VOLK iNview** and **PICTOR PLUS**

I'm looking for a fundus camera that...

adds imaging to my indirect exam.

- ✓ supplements my indirect exam.
- ✓ keeps my patients engaged with eye exams.
- ✓ provides a wide 50 degree field of view.
- ✓ provides reimbursable fundus images.
- ✓ captures images *mydriatically* through a 5mm pupil.

makes my desktop camera portable.

- ✓ provides clinically validated superb quality imaging.
- ✓ is used widely for screening and nursing home visits.
- ✓ seamlessly integrates into my EMR.
- ✓ fits with my practice workflow.
- ✓ captures images *non-mydriatically* through a 2.7mm pupil.
- ✓ provides reimbursable fundus *and* anterior images.
- ✓ captures images out to 120 degrees (with rotation).
- ✓ can be used in all lighting conditions
- ✓ is easy to learn with superb ease-of-use.
